

# Divide Whole Numbers

---

Estimate by using compatible numbers. Then find the quotient.

1.  $6 \overline{)71}$

2.  $4 \overline{)69}$

3.  $7 \overline{)437}$

4.  $8 \overline{)\$6.48}$

5.  $45 \overline{)785}$

6.  $33 \overline{)596}$

7.  $24 \overline{)658}$

8.  $52 \overline{)\$8.84}$

9.  $18 \overline{)2453}$

10.  $67 \overline{)2165}$

11.  $98 \overline{)9988}$

12.  $76 \overline{)\$93.48}$

13.  $87 \overline{)3175}$

14.  $29 \overline{)8693}$

15.  $41 \overline{)3462}$

16.  $16 \overline{)\$15.20}$

## PROBLEM SOLVING

17. A school paid \$62.25 for 25 identical paintbrushes.  
What did each paintbrush cost? \_\_\_\_\_

18. Each tour bus carries 35 passengers. If 1470 people  
sign up for a local tour, how many full buses  
will there be? \_\_\_\_\_
